🐾 pawMood - Real Pet Emotion AI

Understand your pet's feelings, breed-specifically

Mini Project by **HONALU KENCHAVAR & Likhitha** - 5th Sem

Why pawMood?

Most pet emotion apps are generic. **pawMood** is breed-specific. A Labrador's anxiety looks different from a Persian cat's anxiety. We detect that.

Features

- **Real CNN**: CLIP ViT-B/32 Vision Transformer (400M images) - sees pixels, not random
- **5 Pet Types**: Dog, Cat, Hamster, Rabbit, Bird
- **20+ Breeds**: Labrador, German Shepherd, Persian, Siamese, etc.
- **7 Emotions**: happy, anxious, angry, sad, playful, sick, relaxed
- **Breed-Specific Reasoning**: Why this breed shows this emotion + owner suggestion (USP)
- **Video**: OpenCV middle frame -> CNN
- **LLM Chat**: Gemini 1.5 Flash ready

Live Demo

Deploy on Streamlit Cloud - free

Installation

```
pip install -r requirements.txt
streamlit run app.py
```

Add Gemini API Key (Optional)

Create `.streamlit/secrets.toml`:

```
GEMINI_API_KEY = "your_key_here"
```
